**M1™**

This system has been designed to provide the clinician with the finest quality and most reliable microdermabrasion technology in a system that is specifically designed for aesthetic procedures.

- Crystal & Crystal-Free Skin Resurfacing Technology
- Lightweight & Portable
- Independent Vacuum & Crystal Flow Controls
- High Flow Fluidics Designed with Advanced Pneumatics for Optimal Performance
- Precise Analog Vacuum Flow Gauge
- Ergonomic Dual-Mode Hand Piece with Dual-Lumen, Color-Coded Tubing Set

**M2™**

This system has been designed to give the operator the highest levels of performance available in a closed-loop, vacuum microdermabrasion system. The M2 is ideal for the user who wants the finest in medical microdermabrasion technology, with additional power than the M1™ machine.

- Crystal & Crystal-Free Skin Resurfacing Technology
- Independent Vacuum & Crystal Flow Controls
- High Flow Fluidics designed with advanced pneumatics for optimal performance
- Precise Analog Vacuum Flow Gauge
- Ergonomic Dual-Mode Hand Piece with Dual-Lumen, Color-Coded Tubing Set
